

# MOST BABIES ARE BORN with the most perfect little ears...

**However, ear anomalies remain the  
Most common newborn deformity.**

Ear molding with InfantEar™, the safe, non-surgical ear molding system that can be performed in your pediatric office. In just 2-3 weeks\*, InfantEar™ can dramatically and permanently improve your patient's outer ear appearance.

*\*If treatment is initiated in the first 2 weeks of life.*

**Join other pediatricians who now offer the InfantEar™ system to their patients.**

The ear molding procedure is covered by most insurance companies.
