

Modernizing Premier Pediatrics' vaccine program

Overview

Dr. Julie Capiola is one of the founding physicians at Premier Pediatrics (with locations in Manhattan and Brooklyn and a predominantly private payor mix).

Challenge

Lower margins than expected

Even if vaccine margins look attractive, adding up all costs lead the practice to lose money overall.

Labor shortage

High employee turnover and labor shortage heightened the need to automate menial tasks.

Human error

Errors were made when ordering, billing, and entering data that cost the practice time and money.

Conclusion

With Canid, Premier lowered the need to hire more staff, while also improving their bottom line.

Canid's Solution

Guaranteed & clear margins

With Canid, the practice receives 100% of the admin without paying hidden costs.

Full back-office automation

Canid reduced time spent on vaccines by over 90%, removing the need to hire additional staff.

Simple scanning process

Canid makes it impossible for most common errors to occur via their simple scanning workflow.

"Canid has allowed us to make more money and simplify our vaccine program. They held our hand every step of the way." - Dr. Capiola
