[†]Helps support normal functioning of immunity, cognitive development, and physical growth

[‡]Milk Fat Globule Membrane

[‡]Human Milk Oligosaccharides, not from human milk

a family business

we're an independent family business dedicated to putting families first.
always have, always will

our co-founders:

Ross (dad!), Will
& Dylan (brothers!)

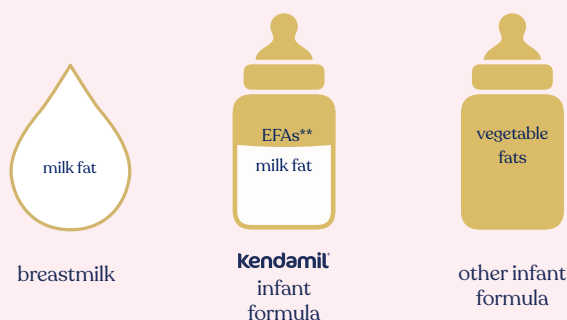

Kendamil® uniquely **uses whole milk** as a source of fat

fat is an important nutrient providing infants with **energy and the building blocks for healthy growth and development**

fat also plays a role in regulating the infant's gut comfort¹, benefits of whole milk include...

- ✓ softer stools
- ✓ reduction in gut discomfort
- ✓ less crying and irritability
- ✓ reduction in fatty acid soaps

Kendamil® contains **no palm oil**

our commitment is better for infants and their environment...

- ✓ palm oil has been shown to have a negative impact on infants' ability to **absorb fats and calcium**, reducing bone mineral content and bone mineral density²
- ✓ **palm oil can make stools harder**, potentially resulting in constipation and/or medicalization³
