

Genetic Testing

autism spectrum disorder
& intellectual disability

Saliva-based testing with Quadrant Laboratories

Have a patient that has been diagnosed with autism spectrum disorder or an intellectual disability?

Request an ASD/ID Genetic Test Panel to further assess their diagnosis, guide care plans and connect your patient and family to relevant resources.

Why test with Quadrant Laboratories?

- We use a simple, non-invasive saliva swab collection process
- We analyze a full panel of the latest genes associated with ASD and ID
- We ship the test where it is most convenient for you and your patient
- We complete a benefits investigation with all families before testing to avoid surprise costs
- We offer genetic counselors to guide you and your patient through the testing process

Ordering Process

Request Testing

There are two easy ways to order a test:

1. Submit a request through your Athena EMR System.
2. Scan the QR code to download our test requisition form.

Determine Coverage

Our support team will work with the patient's family to determine coverage and estimate any potential out-of-pocket costs.

Review Testing

Genetic counselors will review the order to confirm medical necessity for optimal payor coverage and send out any outstanding forms electronically to complete.

Ship Test Kit

A test kit containing a saliva swab will be sent to your practice or the patient's home for saliva collection.

Send Results

Results will be sent to you within 4-6 weeks after receipt at our lab.
