

Equity & Anti-Racism

A psychologically safe space where healthcare professionals can explore their own implicit biases and motivations.

Developed with the American Academy of Pediatrics as part of their Global Health Education portfolio.

Learning Objectives

This module aims to provide a psychologically safe space where healthcare professionals can explore their own implicit biases and motivations before embarking on global health experiences.

Recognise, reflect on, and mitigate implicit bias

Prepare for meaningful conversations around inequity, racism, systems of oppression and structural violence, and the legacies of colonialism and neo-colonialism
