

Graduate Medical Education

pediatrics.northwestern.edu/education

The Pediatric Residency and Fellowship Programs at the McGaw Medical Center of Northwestern University are academically affiliated with Northwestern University Feinberg School of Medicine and based at Ann & Robert H. Lurie Children's Hospital of Chicago. Feinberg Pediatrics faculty members lead in their respective specialties and provide supervision and mentorship for trainees.

Lurie Children's is Illinois' only freestanding hospital exclusively for children and is located in the heart of downtown Chicago amid the research-driven Feinberg School of Medicine and Northwestern Medicine campuses. This location allows us to build clinical exposure to a highly diverse ethnic and socioeconomic patient population into our training experiences. Lurie Children's has 1,800+ physicians and allied health professionals in 70 pediatric specialties and is currently conducting more than 1,500 patient-related research studies, including more than 200 industry-sponsored clinical trials.

Pediatric Residency

The nationally-ranked Pediatric Residency Program at Northwestern University Feinberg School of Medicine is consistently one of the most sought after in the country.

Features:

- Certificate Programs in Advocacy & Population Health, Global Health, Medical Education, Primary Care & Community Health and Bioethics help customize career paths for residents
- kidSTAR Program offers experiential simulation training to enhance patient safety
- Focus on high quality education, resulting in one of the highest board pass rates in the nation: 99% over the last 10 years.
- Pediatric Physician-Scientist Training Program (PSTP) facilitates the development of MD-PhD residency recruits into academic clinician-investigators

Fellowship Programs at Ann & Robert H. Lurie Children's Hospital of Chicago

Fellows participate in a wide diversity of scholarship, including basic lab science, clinical, translational, medical education, ethics and advocacy. The common curriculum for fellows includes the Fellows College, a workshop series held every four months attended by fellows in all pediatric subspecialties. We offer a wide range of resources, mentorship opportunities and training to help our fellows excel as physician-scientists.

- Advanced General Pediatrics and Primary Care
- Adolescent Medicine
- Allergy and Immunology
- Anesthesiology
- Cardiac Electrophysiology/Catheterization
- Cardiac Intensive Care
- Cardiology
- Child and Adolescent Psychiatry
- Child Abuse
- Congenital Cardiac Surgery
- Craniofacial Surgery
- Critical Care
- Dermatology
- Emergency Medicine
- Endocrinology
- Epilepsy
- Epilepsy Genetics
- Gastroenterology, Hepatology and Nutrition
- Health Services and Population Health Research
- Heart Failure/Heart Transplantation
- Hematology, Oncology and Stem Cell Transplant
- Hospice and Palliative Medicine
- Hospital-Based Medicine
- Infectious Diseases
- Neonatal-Perinatal Medicine
- Nephrology
- Neurocritical Care
- Neurology
- Neuromuscular
- Neuro-Oncology
- Neurosurgery
- Non-Invasive Cardiac Imaging
- Ophthalmology and Strabismus
- Orthopaedic Surgery
- Otolaryngology
- Pathology
- Pulmonary
- Radiology
- Rheumatology
- Sports Medicine
- Surgery
- Surgery Critical Care
- Transplant Hepatology
- Transplant Surgery
- Urology

Research

Faculty members at the **Stanley Manne Children's Research Institute at Ann & Robert H. Lurie Children's Hospital of Chicago** investigate a range of children's health and diseases across the translational science spectrum. Manne Research Institute studies are led by over 750 researchers and staff, and are organized into four scientific pillars: Basic and Preclinical Science; Clinical and Community Trials; Community, Population Health, and Outcomes; and Quantitative Science.

Researchers and staff include physicians, scientists, postdocs, coordinators, statisticians, data analysts, trainees, and others who share their expertise. Our pediatricians and scientists routinely collaborate with our academic partner, Northwestern University, and other medical centers and academic institutions across the globe, as well as with community partners such as schools and governments.

Manne Research Institute receives more than \$80.6 million in external funding annually for research, two-thirds of that from the National Institutes of Health and other federal agencies. It is one of the nation's premier institutes for pediatric research, investing more dollars and resources in pediatric research than any other area hospital.

Health Services Policy Research

The **Mary Ann & J. Milburn Smith Child Health Outcomes, Research, and Evaluation Center** programs inform local, regional and national practice and policy to foster healthy children today and healthy adults tomorrow. Specific research groups include:

Smith Child Health Catalyst

- Research and Evaluation Services
- Voices of Child Health in Chicago
- Pediatric Practice Research Group

Teamwork to Reduce Infant, Child & Adolescent Mortality (TRICAM)

Investigators and Labs

- ARISE Health Lab (Adversity, Racism, Inequities, Structures and Empowerment)
- Center for Allergy & Asthma Research
- Family & Child Health Innovations Program
- Foster Health Lab
- Genetics & Justice Laboratory
