Who Is It For?

Any healthcare provider who wants to learn more about the fundamentals of pediatric dermatology and best practices for treating and managing common dermatologic conditions. Upon completion of the Foundations Modules, the learner will receive up to six (6) CME/CE credits and a Foundations Modules Course Certificate.

What's Included?

- Six modules of expert-led comprehensive education
- Downloadable knowledge-check sheets
- A "When to Refer Clinician Guide"
- Private 30-minute "Ask the Expert" session to seek clarification and even submit your cases for discussion

Plus, everything is online and self-paced so it's easy to fit into your already busy schedule.

AGENDA & FACULTY

FUNDAMENTALS OF ACNE AND MAJOR PIGMENTARY ISSUES

Learn how to diagnose/treat pediatric acne and a number of pigmentation disorders, from post-inflammatory hyperpigmentation to vitiligo.

FUNDAMENTALS OF ATOPIC DERMATITIS (AD)

Learn more about the pathophysiology behind one of the most common skin disorders in young children, as well as pearls for treatment and new and emerging therapeutic options.

FUNDAMENTALS OF COMMON SKIN CONDITIONS – PART I

Learn to recognize and treat common pediatric skin conditions such as psoriasis, seborrheic dermatitis, and pityriasis rosea.

FUNDAMENTALS OF COMMON SKIN CONDITIONS – PART II

Learn to recognize and treat common pediatric skin conditions such as infantile hemangiomas and vascular lesions, diaper dermatitis, and pearls for sun protection.

FUNDAMENTALS OF HAIR DISORDERS AND SCALP CONDITIONS

Learn from the experts how to diagnose and treat hair and scalp disorders in your pediatric patients, including alopecia areata, telogen effluvium, traction alopecia, tinea capitis, scalp psoriasis, and more.

FUNDAMENTALS OF COMMON DERMATOLOGIC INFECTIONS

Learn how to recognize the most common bacterial and viral infections seen in children, including impetigo, MRSA, molluscum contagiosum, scabies, tinea, and more.
