

The University of Michigan Pediatrics Residency Program provides a fantastic opportunity for training in both inpatient and ambulatory pediatrics.

Residents rotate at C.S. Mott Children's Hospital, a 1.1 million square foot, 12-story, 342-bed facility that opened in 2011, as well as multiple satellite clinics located throughout the community.

In addition to direct patient care and clinical exposure, resident education is multifaceted occurring through teaching conferences and scholarly endeavors.

As part of the University of Michigan Health System, there are opportunities to participate in basic, translational, and clinical research with nearly \$300 million in NIH funding and over 60 dedicated pediatric research grants through the NIH.

Residents have access to the Clinical Simulation Center, where they can hone procedural skills as well as gain experience in Mock Code situations.

This program also offers an individualized training approach, through areas of concentration and integrated research pathways.

The University of Michigan Pediatric Residency Program only accepts applications from the ERAS System and participates in the NRMP Match.

As part of your application, we ask for your USMLE/COMLEX score report, medical school transcript, MSPE, personal statement, and 3 letters of recommendation.

Our interview season begins in October and applications are accepted until November 30th.

- Leads efforts, advises on best practices, and coordinates initiatives to enhance inclusion, increase diversity, and promote equity across the institution for our patients, staff, faculty, and students. www.med.umich.edu/ohei

POSTGRADUATE OPPORTUNITIES

WHERE DO WE GO?

- 58% subspecialty fellowships
- 35% primary care
- 7% hospital medicine

Graduates from our program are very competitive in the fellowship process and in the job market. Residents match in fellowships around the country and in every sub-specialty. While many who are pursuing primary care stay on and become faculty, others have had great success finding academic positions at other institutions or private practice jobs.

University of Michigan pediatric residents are highly sought after both locally and nationally to serve as the next generation of pediatricians.

98% FIRST-TIME BOARD PASS RATE OVER THE PAST 10 YEARS

All of our graduates receive discounted access to the University of Michigan's nationally recognized Pediatric Board Review Course.
